SKILL HIGHLIGHTS

- Mobile App Development
  - Android, iOS
  - Native with Java
- Back-End
  - NodeJS
  - PHP Laravel
- Firebase
- SQL, AWS
- Visual Studio Code, Android Studio, XCode
- GitHub, GitLab
- Postman

Programming Languages

- Java
- Dart
- PHP
- NodeJS
- Python

LANGUAGES

- Bangla - Native
- English - Professional
- Malay - Conversational
- French - Basic

HOBBIES

- Coding
- Travelling
- Listening
- Reading

SUMMARY

I am working on mobile and web app development. For development, I am using the flutter, a single code base design framework. I am willing to learn from other's and a quick self learner too.

EXPERIENCE

Mobile App Developer
Biz Trading & Total Cad Solution SDN. BHD
Contact: +60 11 3979 9129
02/2021 - 02/2022
Mechanical & Software Based Company

- A trainer of flutter development
- Lead of development mobile and web
- Implement design from prototype
- Backend API implementation
- Firebase implementation
- App publisher in google play store and app store

Mobile App Developer
Deltafrontier
Contact: +65 9825 6483
08/2020 - 01/2021
AI and iOT Based Company

- Implement design from prototype
- Testing APIs with postman
- Implement Back-end (APIs Implement)
- Application version control (GitHub)
- Worked on remote database Nginx (Linux Server)
- Worked on some others existing projects (Native Android)

Mobile App Developer
RBF GROUP BD
Contact: +88 01974 262003
01/2018 - 07/2020
iT and Software Based Company

- A Lead developer.
- Group wise working exercises.
- APIs testing and implement, bug finding, reporting and fixing.
- Work with web and mobile app based softwares.
- Produce management software (Delivery Management, School Management).
- And many more experiences with fun with code.

EDUCATION

Bachelor of Science: Computer Science & Engineering
Universiti Teknologi Malaysia (UTM)
2018 - 2022   *CGPA: 3.08*

Diploma in Engineering: Computer Science & Technology
Feni Computer Institute
2013-2017   *CGPA: 3.43*

Soft Skills

- Web Development
- Photoshop
- Adobe XD, Figma

Development methods

- Agile methodology
  - Clickup
  - Trello, Jira
- CI/CD
  - Codemagic
  - GitHub, GitLab
- UX expert

PROJECTS

Major Projects

From the beginning of my professional working time I was involved with management type applications. Those were my company responsibilities and clients requirements. From those project I am able to come up with a clean basics of Flutter Application development process and now it's become very easy to handle any kind of Flutter project and I can do that. Here below have some of the projects I have worked on.

Visitor Management System: is a management mobile applications where staff user and admin have their own mobile application using that staff able to invite and manage the person will visit the office. Downloading visitor app, visitor able to set the date and time also can set the meeting with whom he want. And an administrator (admin app) can able to manage both of them.
This is local server system so web and mobile apps are not publish in play or app store (Have demo APKs).

Campus Ride: is a ride sharing application for students. Using that students are able to take a free ride inside a campus and other students play role of drivers I call them as a picker. It was my final year project.
Apps are not publish in play or app store (Have demo APKs).

Bikrinaki: is a single vendor e-commerce / marketplace application where our day to day life needed goods are sold.
Web: http://bikrinaki.com
Play store apps: https://play.google.com/store/apps/details?id=com.bikrinaki.userapp
App store apps: https://apps.apple.com/tt/app/bikrinaki/id1607503694

ForCar: is a single vendor e-commerce / marketplace application where cars parts are sold.
Web: https://foorcar.com
Play store apps: https://play.google.com/store/apps/details?id=com.foorcar.user

Orderak: is a full featural application where all kinds of day to day life needed goods are sold and it's a multi vendor application. It's a zone(location) based application.
Web: https://orderak.net
Play store apps: https://play.google.com/store/apps/details?id=orderak.net.userapp
App store apps: https://apps.apple.com/us/app/orderak/id1597713818

Tik Delivery: is a full featural application where all kinds of day to day life needed goods are sold and it's a multi vendor application. It's a zone(location) based application same as Orderak.
Play store apps: https://play.google.com/store/apps/details?id=tikdelivery.com.tikdelivery
App store apps: https://apps.apple.com/tt/app/tik-delivery/id1599953637

QR Attendance System: It is a organization's employee management system. When employees are check in and check out they must need to use this app and need to scan the QR. They can also see the weekly review.
Play store apps: https://play.google.com/store/apps/details?id=emasa.paip.com.etap
App store apps: https://apps.apple.com/us/app/emasa-tap/id1606404194

CERTIFICATION

Top-up IT Training Mobile App Development

The training is on Android App Development .It is a project based training. The title was Top-up IT training conducted by Ernst & Young LLP,India under Leveraging ICT for Growth,Employment and Governance (LICT) Project of Bangladesh Computer Council (BCC),ICT Division,People's Republic of Bangladesh on Android under NASSCOM IT-ITES Sector Skill Council (SSC) Certification . The Program is certified by George Washington University ,USA
